Software Engineer

About

Software Engineer who is passionate about creating user experiences, building products, and architecting solutions to real-world problems.

Experience

Software Engineer II, Clairvoyant; Chandler, AZ – September 2019 to Present

- Develop and deployed multiple full-stack monolithic and micro-service based applications, working in Front-End, Back-End, Mobile, and DevOps teams.
- Architect complete end-to-end solutions for large and complex business problems, developing thorough solutioning documentation and diagrams.
- Implement system optimizations on both ends for speed, performance, and scalability.
- Develop complex features while working with cross-cutting concerns across multiple teams including Product, Design, Development, and QA.
- Onboard and mentor new Junior Software Engineers, helping them solve problems and reviewing their work.
- Work in multiple large teams adhering to Agile methodologies.
- Ensure high-level of quality in developed code through Pull Request reviews.
- Create detailed, in-depth documentation on large-scale features and processes.

Education

University of Arizona; Tucson, AZ – Full-stack Development Certification, 2019
